

Medicinal Properties and Health Benefits of Fermented Rice Fryums (Palaya Sadam Vathal)

Fermented rice fryums combine the natural health benefits of fermented rice with the medicinal properties of traditional spices added during preparation.

1. Gut Health and Digestive Support

- The beneficial probiotic bacteria formed during the fermentation process help flush out toxins from the gut.
- Ingredients like cumin (jeera) and asafoetida (hing) help relieve indigestion, stomach bloating, and gas issues.

2. Natural Energy and Vitamin B

- The fermentation process produces rich amounts of B-Complex vitamins and Vitamin B12.
- These provide instant energy to the body, strengthen the nervous system, and help combat fatigue.

3. Ulcer Relief

- The natural cooling properties of fermented rice help regulate stomach acidity.
- Consumed with meals, mildly spiced fryums provide relief from stomach ulcers.

4. Flavor-Specific Health Benefits

- **Garlic Fryums (Poondu Vathal):** Helps maintain healthy blood pressure levels and lowers bad cholesterol.
- **Black Pepper Fryums (Milagu Vathal):** Boosts immunity and helps clear throat congestion, cough, and respiratory passages.
- **Curry Leaf Fryums (Kariveppilai Vathal):** Rich in iron and antioxidants; promotes hair health and helps prevent anemia.
- **Cumin & Asafoetida:** Stimulates digestion and improves appetite.

Note: Keeping the salt level moderate during preparation is ideal, especially for individuals with high blood pressure. Using good-quality oil for frying helps retain maximum health benefits.
